EDUCATION

The University of Texas at Dallas *M.S. in Business Analytics and Artificial Intelligence* **GPA 3.760** Aug 2023 - May 2025
Relevant Coursework: Product Strategy, Data Visualization, Predictive Modeling, Business Intelligence, Machine Learning
Presidency University, Bangalore *B.Tech in Electronics and Communication Engineering* **GPA 3.800** Aug 2019 - Jun 2023

CERTIFICATIONS AND TECHNICAL SKILLS

Programming: Python, SQL, R
ML / AI: TensorFlow, PyTorch, Transformers, XGBoost, LSTMs, SBERT, FAISS, RAG
Data Engineering: ETL, Feature Engineering, Data Cleaning, Model Deployment
Visualization: Power BI, Tableau, Excel (Pivot, VLOOKUP, Automation)
Cloud & Tools: Azure, AWS, Databricks, Git, Docker, Jira, Confluence
Methods: NLP, Deep Learning, Predictive Modeling, Analytics, A/B Testing
Certifications: Google Cloud Associate Data Practitioner, Azure AI Fundamentals, Applied ML, Salesforce AI Associate

PROFESSIONAL EXPERIENCE

WorldLink US - AI Engineer **Frisco, TX** | Sep 2025 – Present

- Built **GRC AI platform (CodifAI)** using **RAG + FAISS**, improving PRC (Process–Risk–Control) mapping accuracy by **30%** across FFIEC & NIST frameworks.
- Engineered an **automated policy-scanner pipeline** processing **5,000+ documents**, reducing manual review time by **20%**.
- Developed an **LLM-powered policy chat assistant** using BM25 + embeddings, increasing query precision by **25%**.

ImpacterAI - AI Engineer **United States** | Sep 2025 – Sep 2025

- Built large-scale Python scrapers capturing **10,000+ property listing records** with 98% accuracy.
- Consolidated multi-source datasets, reducing redundancy by **25%** and improving data completeness by **30%**.
- Standardized schemas and automated merging pipelines improving data quality significantly.

Compass Group USA - Marketing Data Analyst **Dallas, TX** | May 2024 – May 2025

- Analyzed customer transactions** to identify sales trends and optimize product offerings, driving a **15% increase in top-selling items**.
- Built interactive Power BI dashboards improving reporting efficiency and boosting leadership visibility into KPIs by 30%.
- Automated weekly reports** using SQL & Excel, reducing manual effort by **25%** and improving reporting accuracy for executives.
- Collaborated with cross-functional teams** to implement data-driven strategies, improving **sales forecasting accuracy by 20%**.

Tata Elxsi - Machine Learning Engineer **Bangalore, India** | Jan 2023 – Jun 2023

- Developed **ML models** that improved predictive accuracy by 30%, surpassing project requirements and client benchmarks.
- Implemented preprocessing pipelines** that enhanced data quality, improving **training efficiency by 25%** and reducing prep time.
- Integrated ML solutions into client systems**, streamlining workflows and cutting **processing time by 15%**.
- Contributed to full ML lifecycle** (testing, deployment, monitoring), ensuring 99% production uptime and scalable performance.

ACADEMIC PROJECTS

UT Dallas Conversational AI Chatbot (Rasa + FAISS + SBERT + MongoDB) | [Link](#) | Jan 2025 – Mar 2025

- Developed a chatbot using **Selenium, MongoDB, Sentence-BERT** embeddings, **FAISS** search, and **Chainlit** frontend integration.
- Implemented **Rasa** for NLU and backend actions, collecting **user feedback** to continuously improve answer quality.
- Evaluated multiple LLMs (**Mistral, OpenAI, FLAN-T5, IBM Watson**) to balance response accuracy and system performance.

Emotion Detection using Multi-Label Classification (NLP) | [Link](#) | Sep 2024 – Dec 2024

- Developed models using **RoBERTa, LSTM, DistilBERT**, and **LLaMA**, optimizing with **W&B** tracking and hyperparameter tuning.
- Implemented **multi-label classification** for tweets, achieving a top Kaggle leaderboard ranking among peer submissions.
- Fine-tuned transformer models** for contextual **emotion extraction**, improving accuracy and interpretability of results significantly.

American Express Credit Risk Prediction (XGBoost & Neural Networks) | [Link](#) | Jan 2024 – Mar 2024

- Implemented **XGBoost and Neural Networks** for **credit risk scoring**, achieving **AUC of 0.92** on validation datasets.
- Applied feature engineering, **SHAP** explainability, and **hyperparameter optimization** to enhance model trust and accuracy.
- Delivered a **production-ready ML pipeline**, enabling stakeholders to assess borrower risk with data-driven confidence.
