## SUMMARY

Data Scientist specializing in agentic AI and machine learning with over three years of experience developing and deploying GenAI-focused applications. Expertise in designing LLM-based pipelines using PyTorch, FAISS and RAG for automated document ingestion and semantic retrieval. Delivered production-grade AI solutions that boosted extraction accuracy and reduced manual processing. Collaborative problem-solver adept at full ML lifecycle and cross-functional teamwork.

## EDUCATION

### The University of Texas at Dallas

M.S., Business Analytics and Artificial Intelligence (GPA: 3.760)

- **Coursework:** Product Strategy, Data Visualization, Predictive Modeling, Business Intelligence, Machine Learning

Aug 2023 - May 2025

### Presidency University, Bangalore

B.Tech, Electronics and Communication Engineering (GPA: 3.800)

Aug 2019 - Jun 2023

## SKILLS

- **Programming:** Python, SQL, R
- **ML / AI:** TensorFlow, PyTorch, Transformers, XGBoost, LSTMs, SBERT, FAISS, RAG, GenAI Applications, Deep Learning Frameworks
- **Data Engineering:** ETL, Feature Engineering, Data Cleaning, Model Deployment, MLOps
- **Visualization:** Power BI, Tableau, Excel (Pivot, VLOOKUP, Automation)
- **Cloud & Tools:** Azure, AWS, Databricks, Git, Docker, Jira, Confluence, Devin AI
- **Methods:** NLP, Deep Learning, Predictive Modeling, Analytics, A/B Testing, Analytical Skills

## PROFESSIONAL EXPERIENCE

### WorldLink US

#### Agentic AI Engineer

- Built an agentic GRC AI pipeline using LLMs, Transformers, FAISS, and semantic classification, improving PRC (Process–Risk–Control) extraction accuracy by 30% across FFIEC and NIST frameworks.
- Automated regulatory document ingestion and analysis with OCR, sectioning, and embeddings via MLOps pipelines, processing 500+ documents and reducing manual compliance review time by 20%.
- Developed GenAI compliance agents for policy querying and obligation retrieval using BM25 + embeddings, increasing regulatory query precision by 25%.
- Designed and implemented confidence scoring and validation logic for extracted obligations and controls using deep learning frameworks, improving result consistency and reducing false positives in regulatory analysis outputs.

Sep 2025 - Present

Frisco, TX

### Compass Group USA

#### Marketing Data Analyst

- Leveraged analytical skills to analyze customer transactions and identify sales trends, optimizing product offerings and driving a 15% increase in top-selling items.
- Built interactive Power BI dashboards improving reporting efficiency and boosting leadership visibility into KPIs by 30%.
- Automated weekly reports using SQL & Excel, reducing manual effort by 25% and improving reporting accuracy for executives.
- Collaborated with cross-functional teams to implement data-driven strategies, improving sales forecasting accuracy by 20%.

May 2024 - May 2025

Dallas, TX

### Tata Elxsi

#### Machine Learning Engineer

- Developed ML models using deep learning frameworks such as TensorFlow and PyTorch, improving predictive accuracy by 30% and surpassing project requirements and client benchmarks.
- Implemented preprocessing pipelines that enhanced data quality, improving training efficiency by 25% and reducing prep time.
- Integrated ML solutions into client systems, streamlining workflows and cutting processing time by 15%.
- Contributed to full ML lifecycle (testing, deployment, monitoring), including model deployment practices, ensuring 99% production uptime and scalable performance.

Jan 2023 - Jun 2023

Bangalore, India

## ACADEMIC PROJECTS

### Conversational AI Chatbot | [Link](#) | UT Dallas

- Developed a chatbot using Selenium, MongoDB, Sentence-BERT embeddings, FAISS search, and Chainlit frontend integration.
- Implemented Rasa for NLU and backend actions, collecting user feedback to continuously improve answer quality.
- Evaluated multiple LLMs (Mistral, OpenAI, FLAN-T5, IBM Watson) to balance response accuracy and system performance.

Jan 2025 - Mar 2025

### Emotion Detection using Multi-Label Classification (NLP) | [Link](#)

- Developed models using RoBERTa, LSTM, DistilBERT, and LLaMA, optimizing with W&B tracking and hyperparameter tuning.
- Implemented multi-label classification for tweets, achieving a top Kaggle leaderboard ranking among peer submissions.
- Fine-tuned transformer models for contextual emotion extraction, improving accuracy and interpretability of results significantly.

Sep 2024 - Dec 2024

### Credit Risk Prediction | [Link](#) | American Express

- Implemented XGBoost and Neural Networks for credit risk scoring, achieving AUC of 0.92 on validation datasets.
- Applied feature engineering, SHAP explainability, and hyperparameter optimization to enhance model trust and accuracy.
- Delivered a production-ready ML pipeline, enabling stakeholders to assess borrower risk with data-driven confidence.

Jan 2024 - Mar 2024

## CERTIFICATION

- Google Cloud Data Practitioner
- Applied ML
- Databricks Gen AI Engineer
- Azure AI Fundamentals
- Salesforce AI Associate
- Snow Pro Core
